Subject: Financial assistance for engineered design for Flaura's Acres OSS project

Dear Flaura's Acres Board Members,

On July 11, 2023, the Clallam Conservation District board approved your application for grant funding to cover the costs of engineering and design services for connecting Flaura's Acres onsite septic systems to the City of Sequim's sewer system. They approved paying 100% of the engineering, land survey, and design costs for developing plans not to exceed \$56,176. This funding expires on September 30, 2023, and all work and associated invoices must be completed and submitted prior to that date.

You may now secure the services of a licensed engineer/septic designer to perform this work. Only design costs incurred after July 11, 2023, are eligible for reimbursement. It is recommended that an Assignment of Payment form is used so the Conservation District can pay your engineer/contractor directly. All invoices must be submitted and approved by your board/project manager before the Conservation District can pay the engineer/contractor using the Assignment of Payment form.

The design will need to be approved by Clallam County Environmental Health as part of the permitting process.

Sincerely,

Jennifer Bond
