

# **Survey: Residential Interest in Utility Local Improvement District (ULID) for Sewer Improvements**

Dear Resident,

The Flaura's Acres current sewer system is nearing imminent failure status due to its age. Clallam County has applied on Flaura's behalf to the Department of Ecology for a grant/loan program to fund this project.

The Homeowners Association in conjunction with Clallam County is considering establishing a Utility Local Improvement District (ULID) in your area to fund the loan portion of sewer infrastructure improvements. Additional grant funding being sought may allow for the connection to the city water system to be included in the project as well. The sewer project will provide long-term benefits, including reliable power during outages, professional management of the sewer system and protection of the existing drinking water system from contamination. These benefits would add additional value to properties and with the addition of including the drinking water system in the project, would add reliable power, fire hydrants to the neighborhoods, and could possibly result in lower insurance rates.

We value your input to help determine the level of community support for this initiative. Please take a few minutes to complete this survey.
